Version 1.0 2015-01-30

1 Introduction

The System API in Lifecare Exchange Services provides services that make it possible to exchange files and start batch programs.

1.1 Prerequisites

Before you can get access to the System API you must request a license key from Tieto. You should have basic HTTP knowledge before you start using the API.

The system must be configured with a correct root directory on server for uploading and downloading. All batch programs must be configured with path and batch id. Lifecare Resource Agent service must be configured with a Windows user with correct access privileges for disk and process execution.

2 Services

All network services are based on HTTP REST technology and organized in school types to match each school structure. Services are using HTTP POST and HTTP GET for upload and downloading.

Base path for services are: https://host/les/system/v1/system.svc

2.1.1 ListFileNames

Returns all filenames for stored files on server.

2.1.2 GetFile

Return a specific file on server identified by file name.

Service parameters:

Parameter	Mandatory	Description
Filename	Yes	Filename for stored file
