1 Introduction

The Admission API provides services that make it possible to set and get the admission information. The services in the Admission API are accessed via URIs.

Admission of external students is used for admission of external students, e.g. students that studies in a school in another municipality.

This document refers to documentation/standard where you can find information about:

- Which admission information that a user can set and get via the Admission API.
- How the admission information is divided into entities/classes and how these entities are structured.

1.1 Prerequisites

Before you can get access to the Admission API you must request a license key from EG Edlevo. You should have basic knowledge on Swedish school system, W3C XML before you start using the API.

3 Admission of external students

3.1 Domain model

The diagram below describes how the information is divided into entities and how these entities are structured.

3.2 Entities

3.2.1 Student

Name	Description	Read-only
id	Person id for the applicant	No
firstname	First name	No
lastname	Last name	No
hasgraduated	Has graduated	No
hasstudycertificate	Has study certificate	No
unit (See 3.2.2)	Unit	No
program (See 3.2.3)	Program	No
municipalitycode	Municipality code	No
privacy	true, if the person has privacy restrictions, false if no restrictions. “level” indicates type of privacy 1 Address information is protected 2 National registration is protected 3 1 and 2	Yes

3.2.2 Unit

Name	Description	Read-only
name	School name	No

© 2026
EG Edlevo

Name	Description	Read-only
address	Street address	No
pcode	Postal code	No
city	City	No
phone	Phone	No
email	Email address	No
municipalitycode	Municipality code	No
governedby	Governed by	No
schoolunitcode	School unit code	No
schooltype	School type	No

3.2.3 Program

Name	Description	Read-only
code	Program code	No
profile	Profile	No
variant	Variant	No
schoolyear	School year	No
start	Start date	No
end	End date	No
amount	Amount	No
pricecode	Price code	No
reason	Reason for cost	No
